MEMORANDUM

To: Gregory J. Oravec, City Manager
Department Heads

From: David K. Pollard, CGFO, OMB Director

Date: July 13, 2012

Re: **Proposed FY 2012-13 Budget**

The attached spreadsheets and charts represent the FY 2012-13 Proposed Budget for the City of Port St. Lucie. The budget total of \$478,301,953 includes all Operating and Capital Improvement Funds. This is an increase of \$52,586,362 from the originally approved budget for FY 2011-12 mostly because the Crosstown Parkway CIP Fund includes grants totaling \$35 million that are expected to be collected in FY 2012-13. Several operating funds will have a smaller budget due to the reduction in funding and cost reductions. The Proposed Budget is based on a decrease of 0.1000 to the overall Millage Rate which when combined with the 2.18% drop in taxable value, will lead to a drop in total property taxes of \$1.4 million. A total of 967.41 FTE's are funded with this proposed budget, which is a net decrease of 4.34 FTE's. Several departments went through reorganizations recently with some departments dropping staffing while the Police Department will have increased staffing after dropping several management positions and IT staff and then adding sworn patrol officers. City Council Budgetary Policies and directives are discussed below and in the case of the Budgeted Contingency, a higher level is included in this proposed budget. The Police Sworn Staffing Policy had been suspended by the Council during these difficult economic times, however with the reorganization, progress was made toward meeting that staffing level policy.

Key Budget Points

Taxable Property Valuation

The taxable value for all properties in the City of Port St. Lucie is set at \$6,317,778,096 for the FY 2012-13, which is a 2.18% decrease from the value used for budgeting purposes last year. This is the fifth year in a row that the taxable value has dropped making the current value less than half (48.5%) of the 2007 value of ≈\$13 billion which was the peak in the market. This has had a serious impact on the budget equation of the City as a number of facilities and staffing in several areas were added since 2005. Some of this revenue loss was recovered by increases to the Millage Rate in past years while there also have been staffing reductions and other cost reductions. The City also took steps to increase the Electric Utility Tax rate from 5% to the current 10% in November 2010. The rate for the City's Communication Services Tax was adjusted from 1.5% to the maximum allowed rate of 5.22% in August 2009.

The poor condition of the Real Estate Market is the driving force behind the dropping Taxable Value. It certainly appears that the market value is bottoming out with this minimal drop in value. For the purpose of future financial projections, the City is anticipating a stable taxable value figure.

City's Total Millage Rate

The City Manager's Proposed Budget includes a reduction to the City's Millage Rate of 0.1000 for a total proposed property tax rate of 5.6289. This reduction is being proposed to the operating millage rate that funds the General Fund, Road & Bridge Operating Fund and Road & Bridge CIP Fund. The rate designed for retiring debt on the Crosstown Parkway road project will remain at 1.2193. The impact of this rate reduction is a drop in revenue of \$604,247. When combined with the 2.18% drop in taxable value, the total drop in revenue will be \$1.4 million allocated among the four funds that receive property tax revenue.

Pay Rates

The proposed budget for FY 2012-13 contains two adjustments to staff salaries. First, in response to the fact that it has been three years for management staff and two years for most union bargaining groups since a Cost of Living Adjustment (COLA) has been made available, this proposed budget includes a 1.50% COLA for all budgeted staff, except for employees with individual contracts or directors and assistant directors who are above the median payrate for their position. This increase is budgeted to happen on each employee's anniversary date with the City. The CPI index indicates that inflation over the past three years has been 7.5% while the past two years has been 5.3%. The second salary adjustment is a one-time bonus that is tied to the increase in employee health insurance contribution. The concept is to make employees whole after suffering the impact of the higher health insurance contributions. The bonus is set at \$1,554 per full time employee (FTE) which will generate a \$1,000 net pay amount. This bonus is budgeted for all staff, full time and part time, on an FTE basis, meaning the amount is pro-rated based on their status (half time, ¾ time, etc.).

Health Insurance Cost

City Administration has been aware for years that the employee contribution toward the Health Insurance Plan has been well below the market norm, and beginning in FY 2011-12, the various union groups agreed to adjust those rates. Because of differences in plans, the employee and employer split of the contributions was studied on a percent basis. In recent months, staff has conducted a study of a benchmarking group of agencies and found that the median employee contribution should be 20% for all coverage tiers other than single coverage. Currently the Port St. Lucie employees in those tiers are contributing 9%. The current single coverage tier contribution of 8% compares closely to the benchmark figure. In order to minimize the impact of the higher employee contribution, staff used a contribution rate of 15% instead of the benchmark median of ±20% for the three tiers other than single. This deals with the correct allocation of costs between the City and the Employees. This increase is part of a multi step process to reach the median of 20% employee contribution,

The next phase of this study was to review the allocation between the different tiers of coverage. The Health Plan administrator (BC/BS of Florida) was able to pull the past four years of claims data per tier of coverage. This data was further reviewed for the number of members in each tier and verified for any anomalies. The funding ratios calculated by the consultant are quite close to the historical ratios used by the City. Their revised ratios are applied to the spreadsheet to develop the contribution amounts. These figures represent the totals for both the employee and employer portions per tier of coverage.

A third factor was used to develop the budget for the Health Insurance Plan. The City has been experiencing favorable claims amounts recently. In fact, in FY 2010-11 the City was able to

reduce its employer contribution by two months and it is anticipated that the same situation will happen this year (FY 2011-12). With this trend in mind, the total amount of funding needed was reduced from \$15.6 to \$12.7 million. This is the total of employee and employer contributions.

Proposed Employee Contributions (monthly):

Coverage Tier	Current Rate	Proposed Rate	Incr. (Decr.) monthly	Incr. (Decr.) Annual
Emp. Only	52.50	45.00	(7.50)	(90.00)
Emp. + Spouse	129.16	199.00	69.84	838.08
Emp. + Family	181.78	257.00	75.22	902.64
Emp. + Child(ren)	95.66	153.00	57.34	688.08

Operating Expenses

City Council Budgetary Policy allows for an inflationary factor of up to 3% to the operating portion of department budgets. However most departments met the goal of no increase (or minimum) to their operating costs. Electric costs have been held down in the current year due to favorable rates, but there is a report of a rate increase request during next year. Fuel cost has been on a favorable downward trend in recent time but can easily bounce around during the next 18 months. Most departments have budgeted for a slight increase in fuel costs. Liability and Workers Comp insurance costs will remain the same as the current year. The vehicle maintenance contract will be impacted by a 2.3% increase after several years of no increase.

Millage Rate for the General Fund

The proposed budget allows for a Millage Rate of 3.4897 for the City’s General Fund. This is a decrease of 0.0791 as a prorated amount of the overall 0.1000 mill drop. This drop in the tax rate will decrease the available revenue for the General Fund by ±480,000. This contributes to the overall reduction in the tax burden to the property owners in the City.

Millage Rate for the Crosstown Parkway project

The City Council budgetary policy allows for the necessary millage rate to make the debt payments on the \$165 million in bond debt that was approved by a voter referendum. This proposed budget includes 1.2193 as part of the overall millage rate for the debt on this road project. This rate is not recommended to change from the current FY 2011-12 year and thus will generate ±\$200,000 less revenue due to the drop in taxable value. With the current taxable value level, an increase to this millage rate might be required to cover the debt service if the full amount of voter approved bonding was issued. It should be noted that the current taxable value is less than half of the value in 2007 when the market peaked.

Rolled Back Rate and Maximum Millage Levy Calculations

Part of any proposed budget should identify and discuss the Rolled Back Rate and its potential financial impact. The Rolled Back Rate is defined as the Millage Rate required to earn the same level of property tax as in the prior year allowed for under the State of Florida TRIM regulations. The rolled back rate allowed by TRIM is 5.8554. However this rate would cause a slight drop in budgeted revenue of \$7,346 because the final value (after the adjustment by the Value Adjustment Board) fell by 1.2% after the budget was set which used the certified value. Thus, TRIM works from the final value and the revenue that was earned from it not the certified value.

The separate calculation of the "Maximum Millage Levy Calculation" gives the City an additional option for the millage rate. This higher rate is based upon a formula that allows the recapture of the revenue had the City chosen the maximum rate allowed for in the prior year under the majority vote option. Under this regulation, three votes of the five Council Members will allow a total rate of up to 9.1493. The Maximum Millage Rate would generate nearly \$20 million more revenue than the current fiscal year. These rates include the operating rate plus the corresponding voted debt rate for Crosstown Parkway.

Stormwater Fee

The annual Stormwater Fee is not recommended to change under this proposed budget and will remain at \$153.00. In FY 2009-10, the rate was increased by \$20 to cover the EWIP project and inflation. The current revenue methodology produces very little growth without a rate increase. As the City expands roads to a four lane design with a median, the volume of landscaping to be maintained increases and the funding must be considered which places pressure on this funding source. The Public Works department has worked on reducing these costs by dropping the number of rotations for mowing and other services.

Police Sworn Officer Staffing

The current City Council Budgetary Policy is to staff 1.6 officers per 1,000 of population. However, with the recent budget struggles, the City Council suspended this component of their policy. And in FY 2009-10 and 2010-2011, Police Officer staffing was reduced by 50 positions to the FY 2011-12 level of 206 sworn officers. This generated a staffing ratio of 1.25 officers per thousand of population. However a significant reorganization of the Police Department in the spring of 2012 resulted in a net increase of sworn officers of 15.5 for a new total of 221.50. This generates a staffing level of 1.34 officers per 1000. This increase was accomplished with no cost increase due to dropping several management level officers and several civilian positions. Plus two of the new officers are funded in the City's Parks Department.

General Fund Subsidy of the Saints Golf Course Fund (being adjusted)

Beginning in the current 2011-12 fiscal year, the Saints fund no longer needed a financial subsidy from the City General Fund. In prior years, a transfer of 20 to 25% of the golf course's operating budget was needed to balance this fund's budget. After a reorganization of the staffing, their costs were reduced by hiring a labor company for many of the maintenance positions and resulted in a balanced budget.

Financial Contingency of Minimum Four-Percent (being adjusted)

The adopted budgetary policy calls for a 4% financial contingency. However a benchmarking study of 16 comparable cities, plus the Government Finance Officers Association (GFOA), shows that Port St. Lucie is the lowest in the group with a 4% financial contingency. Most (11 of 17) are 10% or greater. Thus, in the City Manager proposed budget for FY 2012-13, each operating fund has an 8% Financial Contingency which is almost a one month reserve. Additionally, the City Manager is requesting that the General Fund's budgeted contingency be set at 17%, which is the Best Practice level from the GFOA which equals a two month reserve. There is one exception to that policy. The Building Department has a Council policy of holding a 6 month contingency (50%). There are several funds that will carry a slightly larger contingency to help their financial condition in the future years where a deficit was projected. As a future goal, the City Manager would like to strive to reach the GFOA's recommended practice of two months contingency (17%) for all operating funds.

Summary of Rates and Fees

	<u>Current</u>	<u>Proposed</u>	<u>Difference</u>
Millage Rate	5.7289	5.6289	(0.1000) decrease
Stormwater Annual Fee	\$153.00	\$153.00	no change
Street Lighting Annual Fee	\$27.00	\$27.00	no change
Building Permit Fees		No changes	
Public Works Inspection Fees		Residential rates – 33% average reduction Commercial rates – 18% average reduction Redevelopment rates – 29% average reduction	
Planning Department Fees		No further changes (New recent cap on acre based fees)	
Parks and Recreation Fees		Possible CPI / Market increase	
Water & Sewer Rates		3.0% Increase	
Solid Waste annual rate	\$262.62	\$268.36	\$5.74

Areas of Concern

Civic Center Debt – When the City built its Civic Center, the project was split funded between the City and the Community Redevelopment Agency (CRA). The CRA financed its financial commitment. In recent years, the taxable value within the CRA has dropped substantially causing its revenue to fall below the level needed to fund its annual debt service. The solution is to use the Parks MSTU revenue to purchase this asset for the City. However this annual revenue of ±\$1.2 million and its balance that was generated by saving on other projects will not last for the duration of the bond debt with annual debt of over \$2 million.

COPS Debt associated with Torrey Pines – Public Building Impact Fees are the funding source to cover the debt on this building project. With the drop in impact fees, the City's General Fund is presently contributing \$2.1 million annually. This is a financial drain on the General Fund and could be further impacted if the developers of the western portion of the City default on their obligation to pay a guaranteed level of fees (take or pay agreements).

Southwest Annexation SAD – Various infrastructure improvements such as roads, drainage and water & sewer were made in this SAD for the future economic development of this portion of the City. As the real estate market fell, the financial equation for the developers that hold this property did not work. Additionally, the annual assessments are negatively impacting the marketability of this property. Thus far the developers have made their annual payments but have had conversations with the City about the financial burden. One possible tool to generate development and job creation in this area is to create a CRA in this area to capture future property taxes to help the financial equation.

City Center SAD Debt – Utilizing the City Center SAD, the City sold bonds to finance the construction of infrastructure improvements to enable City Center to be redeveloped into a mixed used development in accordance with the Community Redevelopment Plan. The bonds are to be repaid by the benefitted property owners, which include the City, Community Redevelopment Agency and private property owners, via special assessments. Unfortunately, the market downturn has hindered the development of the property, and the primary property owner has fallen into arrears on its special assessment payments. Since the City Center SAD bonds include a covenant from the City to budget and appropriate non-ad valorem revenues to make up any shortfall in the repayment of the bonds, the City is exposed to paying more than \$1.5 million per year until the property owner resumes its special assessment payments. In order

to address this exposure in the near term, the City Manager is requesting the City Council's approval to utilize surplus cash to pay off the special assessments that are owed by the City for the Civic Center and Village Square properties in full rather than making annual payments over time. In making these payments, which are already owed by the City, the City would push out any special assessment shortfall until July 2015. This should provide the City Attorney's Office with sufficient time to pursue legal remedies.

Digital Domain Lease – The annual debt service on this project (construction of a state of the art building for this animation firm) is covered by the annual lease revenue being received from the firm. However, if for any reason this firm vacated our facility, the City would have a need to lease or sell this facility to cover the debt. The annual debt service in FY 2012-13 is \$3,482,356.

Rosser Police Sub-Station Debt – The revenue stream to fund the annual debt on this building was a combination of the City's Police Impact Fees, the county-wide Sheriff's Impact Fees (city retains a portion) and the City's General Fund. As the two impact fees dropped, the general Fund is stepping up to cover this debt. Past years the General Fund contributed less than \$100,000 but is now facing a contribution of \$248,983 in FY 2012-13. The FY 2012-13 total debt service amount is \$374,019.

Police 185 Defined Benefit Plan – The Police Officers defined benefit pension fund receives contributions from the participating officers plus a contribution from the state. Above that funding, the City's General Fund is making up any funding shortfall annually. In the proposed FY 2012-13 budget, that contribution is \$1.5 million which is an increase of \$345,000. With the directive that all departmental budgets are to remain flat, the Police Department budget effectively had to be reduced by that amount to afford the additional pension contribution. The additional pension cost is restricting the City's ability to reach its police staffing level as set in the Budget Policy.

Deficit Spending Trends – Many of the City's operating funds have been deficit spending in recent years. A fund balance that was created during the better economic years allowed this to occur while we waited for the economy to turn around. Many departments were adjusted to reduce our costs. But of course this can only occur for a finite number of years. Most of the operating funds now find themselves in a balanced spending plan. This is the result of many departments going through staffing reductions and reorganizations plus a positive trend for some revenues. The Utility and Building Department funds are the remaining concerns that will need to be closely monitored and adjusted as required due to their continued deficit spending trends. Both of these funds are dependent upon their customer base for their revenue. If future revenue growth does not happen, their operating costs (including staffing) will need to be adjusted.

General Fund

The City's General Fund reports the financial activities of all the administrative departments plus the Parks and Recreation and Police Departments. The General Fund grew for a number of years to fund increases to services and programs, inflationary factors and increases in employee healthcare costs. The City was able to make use of the growth in property tax revenue with the record levels of taxable value growth. The need for growth in these departments was fueled by the increasing population. However, the proposed FY 2012-13 budget is the fifth fiscal year in a

row impacted by falling property values. In order to bring this fund's budget into balance, there have been a number of department reorganizations and cost cutting measures in recent years.

Major Revenue Source

The largest single revenue in the General Fund is Ad Valorem Property Tax, which is set to earn ±\$21.3 million in FY 2012-13. This revenue figure is based on a 2.18% decrease in taxable value and adopting a Millage Rate that is reduced by 0.0791 for this fund. This is a drop in Property Tax revenue of nearly \$1 million. The other key point in the revenues is the Electric Utility Tax and Electric Franchise Fee which are expected to climb by ±\$400,000 in FY 2012-13. The City allocation of Sales Tax revenue is showing a slight steady climb and will hopefully gain \$200,000 over this years projected collections. The General Fund had reserved millions in past years in order to cushion itself from the impact of property tax reform and falling values. However, this proposed budget is built with a steady projection of fund balance meaning the deficit spending trends of the past have been overcome.

Expenditure Trends

Salaries and Benefits are the largest cost for the General Fund and have been given considerable effort to control by avoiding payrate increases and increasing the employee health insurance contribution. These measures plus the staffing reduction of past years has dropped personal services by ±\$5.8 million. The staffing changes did bring about a reduction to the level of service in areas such as fewer budgeted Police Officers and reduction to operating hours for several City parks. But to the extent possible, the impact to the level of service was kept to a minimum.

Long Range Model(s)

The long range model included for the General Fund assumes steady taxable value into the future and corresponding steady property tax revenue. The other major revenues of the City are expected to hold steady or perhaps experience slight growth. For expenditures, the assumption is holding staff cost equal into the future years. With these assumptions, the General Fund is able to show a steady increase to its fund balance until the FY 2016-17. In fiscal year 2015-16, it is projected that the General Fund will need to assist with the funding of the CRA by contributing toward the purchase of the Civic Center.

Road & Bridge Operating Fund

The activities reported in this fund include pothole patching, street signs, street striping and road right-of-way mowing. Also the maintenance of the traffic signal system is funded here plus street lighting costs for major roads.

Major Revenue Source

The largest single revenue for this operating fund is Local Option Gasoline Tax revenue and is projected to be \$4.6 million for FY 2012-13. This individual revenue has experienced modest increases in past years. The general economy has impacted this revenue as it is based on volume of gallons sold. This fund also will receive Ad Valorem Property Tax revenue totaling \$2.2 million based on its allocation of 0.3616 of the overall millage rate (drop of 0.0082). With a drop in taxable value of 2.18% and the drop to the Millage Rate, this important revenue will drop by ±\$100,000 when compared to the current year. There is a transfer from two Road & Bridge CIP Funds totaling ±\$5 million to complete the funding of annual debt service on earlier bonds issues for road work from several years ago. The operating fund must pay the debt payments associated with the capital road improvements.

Expenditure Trend

This fund is being impacted by the COLA payrate increase and the one-time bonus budgeted under Personnel Services. The Public Works Department also dropped 8 FTE's from their staffing levels with portions of that savings impacting this fund. Due to decreased staffing and shifting of positions over the years, this cost is down \$1.2 million (27%) from FY 2009-10. There is also a shifting of operating costs out of this fund to the City's Stormwater Fund for the Swale Liner maintenance program. Also of note, this fund is shown with an 8% budgeted contingency which is the level recommended by the GFOA.

Long Range Model

The long range model for this fund indicates that this fund is building a fund balance going into future years. This was not always the trend and is possible because of staff reductions and operating expenses being reduced and shifted.

Stormwater Utility Fund

This is an enterprise fund that earns revenues from an annual fee charged to all property owners for the purpose of constructing and maintaining the City's stormwater system. The most costly item funded each year is the reworking of the roadside swale system. City crews reshape the swale drainage system and in some areas a plastic liner is installed to aid the flow of stormwater. Other activities include mowing and cleaning of the liner system plus canals, ditches and greenbelt areas. The Public Works department is partially funded by this revenue.

Major Revenue Source

This fund's major revenue is the annual stormwater fee and is expected to generate \$19.4 million for 2012-13. The annual fee will remain unchanged at \$153 per residential unit. The only normal growth in the Stormwater Fee revenue occurs when a vacant lot is built on providing ±\$38 per unit additional revenue. This fund will also carryforward \$6.4 million in fund balance. The culvert inspection fee collected in this fund has dropped substantially in recent years as construction slowed in the community. Also of note is the designated revenue (portion of the stormwater fee) for the EWIP project which is combined with the federal subsidy to help cover the debt service on this project.

Expenditure Trends

This fund is also experiencing the same adjustments to personal services (COLA of 1.50% plus the bonus of \$1554 per FTE). However with eight fewer FTE's in the Public Works department, the overall personal services cost is down. Operating costs are fairly stable and costly capital projects are minimized in this proposed budget in order to keep costs within the limit of available funding.

Long Range Model

The long range model for this fund shows a balanced budget for the next two years, however deficit spending in the years beyond that is causing a declining fund balance. This model is based on no increase to the annual rate and also no change to the cost of staffing. In order to balance future years with these assumptions, capital projects will have to be delayed and/or staffing reductions will be needed.

Eastern Watershed Fund

This additional Stormwater Enterprise fund was established last year to account for a large drainage project to help minimize flooding in the eastern portion of the City. The project was bond funded with a portion of the annual stormwater fee covering the debt service. In the Capital Construction Fund,

there is an estimated \$2.5 million to carryforward plus a grant of \$500,000 projected to be collected in FY 2012-13. This remaining balance will be used to complete any outstanding work. Part of this balance was used to prepay special assessments on property bought for this project.

Building Department Fund

This is a special revenue fund that reports the financial activity of the Building Department. This one department was isolated into this single fund so that their revenues (permits fees, etc.) could be easily compared to the cost of their work with their rates being set accordingly.

Major Revenue Source

This fund's largest single revenue, Building Permits Fees, is directly driven by construction activity. New construction has dropped substantially from the record levels of 2004 and 2005. At that time permit fees totaled over \$10 million while the proposed budget is only showing \$2.2 million for this revenue in FY 2012-13. The fund balance of \$3 million for the start of FY 2012-13 is above the stated policy of 50% however, it is projected to continue falling. The proposed revenues for FY 2012-13 are budgeted to be less than the current year due to the sizable permits fees being collected on the construction of Tradition's new hospital. This is considered a "one-time" jump in revenues with residential permits running very low and no significant change in sight.

Expenditure Trends

The 1.50% COLA is included in the personal services plus the one-time bonus of \$1,554. That is of course causing an increase to the FY 2012-13 budget. The department has minimized its capital outlay and operating expenditures in recent years in order to balance their budget using minimum levels of fund balance. Total costs are relatively flat for the proposed year and down from prior years.

It should be noted, there is a downward trend in the fund's balance. For now there is sufficient fund balance to balance the budget, but in FY 2013-14, there is not quite the 50% contingency that is required by the Council Policy. A reorganization will need to be carried out in FY 2012-13 or as part of the FY 2013-14 budget process.

Water & Sewer Utility Funds

There are two operating funds for the City's Water and Sewer Utility, a Connection Fund and Operating (maintenance) Fund. For several years, the rapid growth in the City and this utility system required increased staff and contractor crews to keep up with the demand for connections to the system. As these requests have slowed, staff has been shifting away from the Connection Fee Fund over to the Maintenance Operating Fund. With the recent market trend, the department has stabilized and is trying to keep their costs level. Also included in the Utility group of funds is a Renewal and Replacement Fund which covers the regular replacement of equipment that is part of the system. There is also a Utility Contingency Fund that is holding ±\$30 million to give the bond market a level of confidence in the City's financial condition. This contingency can also be used to stabilize the rates or to reduce debt in the future if needed.

Major Revenue Source

The Water and Sewer Operating Fund is funded primarily by the monthly revenues from the users of the system which is projected to be \$57 million. The reduced number of connections means a slower growth rate for operating revenue and the slight increase to this revenue is because of the projected 3% rate increase. There is a projected cash carryforward source of funds next year of over \$25 million

between the two operating funds, however that balance is projected to fall in future years due to the deficit spending trend.

Expenditure Trends

Both operating funds show a stable level of cost for personal services and operating categories of expense even after taking into account the COLA and bonus impact to personal services plus inflation on some of the operating costs. The only change in staffing is a net drop of one position. The annual debt service is climbing by over \$6 million in FY 2012-13. The 3% rate increase is needed because of this jump in debt service and the relatively low growth in customer base. It is possible that surplus funds could be used for the early retirement of debt to help stabilize the annual debt payments. These funds will be held until the City is allowed to legally retire some of the bonds.

Long-Range Model

This five year look into the future takes into account a limited growth in customers and also assumes a 3% rate increase for water and sewer for the next two years. Costs are shown to be flat into the future. With these assumptions, the fund balance is falling and will show that by FY 2015-16, the 8% budgeted contingency cannot be maintained. However, the test for debt service coverage is being met thru the future years meaning operating revenues are sufficient to fund the debt service requirement.

Saints Golf Course Fund

This enterprise fund tracks the financial activity of the City's Golf Course. In past years the budgetary policy allowed for an annual transfer from the City's General Fund of 20 – 25% of the Saint's budget. However, beginning in FY 2011-12 there is no longer a subsidy of tax dollars needed for this enterprise fund. The budget calls for earning \$1.6 million in greens fees plus several small revenues to fund the operations of the City Golf Course. It is projected that a balance of \$429 thousand will carry into the FY 2012-13 budget. There is only inflation to the current level of operating costs being addressed as there are the same changes to personal services (1.50% COLA and a one-time bonus of \$1,554). This fund is also holding an 8% financial policy contingency (\$110,773) with this proposed budget plus a balance for future years of \$358,961 which can fund future renovations and replacement equipment. The staffing changes made in FY 2010-11 that required outsourcing several of the maintenance positions appears to have worked well resulting in operational savings. This is the cause of increased operating costs but with a corresponding decrease in personal services. This proposed budget calls for a small operating surplus resulting in a climbing fund balance for the Saints Golf Course Fund.

Government Finance Fund

This fund is to account for the revenues and expenditures of the Master Lease Agreements and various Certificates of Participation projects (series 1997 & 2004) such as acquisition of land near City Hall and several buildings that were completed in early 2005. Also, this fund accounts for the Law Enforcement (County Sheriff) Impact Fee which will generate only \$7,000 in FY 2012-13. This revenue is down as the level of construction is substantially less than past years when this fee generated \$186 thousand in FY 2006-07. This revenue pays the debt associated with the Rosser Police Substation. In order to complete the funding to cover the annual debt service, the City's Police Impact Fee will contribute \$20,000 next year and the General Fund must cover the balance with a transfer of \$248,983.

Police Impact Fee Fund

The City imposes an impact fee on new development to help fund the equipment costs associated with new officers. This fund tracks this revenue and the allowed expenses. But with the strong drop in new construction, this revenue has fallen to the projected level of only \$25,000. The majority of this funding will be needed to make a transfer of \$20,000 to help cover the debt service on the Rosser Police Sub-Station. This leaves close to nothing for the needed equipment for the new officers.

Street Lighting Fund

This is a special revenue fund that tracks the financial activity of a unique revenue that is dedicated toward a specific function. Citizens that elect to form a Street Lighting District to provide streetlights in a residential neighborhood will pay an annual fee of \$27 next year per this proposed budget. This is the same rate as the prior year. The other streetlights located along the main thoroughfares in the City are funded within the Road & Bridge Fund using Gasoline Taxes. There are several new districts being added that increase the revenue and expenses of this fund. In the past years, the annual rate was set low enough to draw down the fund's balance because of the excessive balance. The fund must now earn enough revenue to fund its annual costs. The current rate appears to be sufficient to balance the costs and fees.

Major Revenue Source

The significant revenue in this fund is the annual special assessment charged to the residents in the districts. The annual fee of \$27 should generate ±\$314 thousand in the proposed budget year. This fund is projected to carry forward ±\$40 thousand into the fiscal year 2012-13 budget.

Expenditure Trend

The main cost being funded is the electric bills associated with the streetlights. With an increase in the number of districts, the expenses of the fund will increase. The budget for electric use is \$274,727 plus \$26 thousand for administrative costs. The adopted budget has a projected contingency of ±\$54 thousand. If the reported electric rate increase occurs, this contingency would be used to rebalance this budget until the following year when the annual assessment could be adjusted.

National Pollution Discharge Elimination System Fund (NPDES)

This fund separately tracks the cost of this federally required program to control any potential pollution discharge from construction sites. A separate permit fee is being charged and funds the cost of this program. The reduced level of construction is leading to lower revenue levels in this fund. The projected revenue has caused the dedicated staffing to be eliminated. Revenue is expected to be only \$22,000 in FY 2012-13. There will be a projected carryforward of perhaps \$78 thousand which will help fund this program until revenues can rebound. The level of activity will have to be monitored as it will cause a change in the financial position of this program. This adopted budget includes a contingency for future years of \$86 thousand.

Neighborhood Stabilization Fund (NSP)

This is a federal grant fund that is being used to account for the financial activity of the Neighborhood Stabilization program. This fund is the original level of this grant (\$13 million) and its purpose is for reducing blight by allowing the City to purchase and renovate homes that are in poor condition and are in the foreclosure process. The high number of foreclosures has contributed to a large number of

neglected homes. This grant operates on a reimbursement basis thus causing an operating deficit in any single year.

Major Revenue Source

Revenue for this fund is the federal grant received in prior years and will have an expected balance of \$2.9 million to carry into FY 2012-13. It is also project that the sale of homes will generate \$2.1 million.

Expenditure Trends

Administrative costs are budgeted at ±\$300 thousand plus ±\$800 thousand as a contingency for future years. \$3.9 million is available for the housing costs in the FY 2012-13 budget.

Neighborhood Stabilization #3 Fund (NSP)

This is a federal grant fund that is being used to account for the financial activity of the Neighborhood Stabilization program. This is the third level for this grant and was allowed \$3.5 million for reducing blight by allowing the City to purchase and renovate homes that are in poor condition and are in the foreclosure process. The high number of foreclosures has contributed to a large number of neglected homes. This grant operates on a reimbursement basis thus causing an operating deficit in any single year.

Major Revenue Source

Revenue for this fund is the federal grant received in FY 2010-11 and will have an expected balance of \$1.6 million to carry into FY 2012-13.

Expenditure Trends

Administrative costs are budgeted at \$1,079,099 while \$5 million is available for the housing program in the proposed FY 2012-13 budget.

Community Development Block Grant (C.D.B.G.) Fund

The CDBG federal entitlement block grant is allocated to cities with a population over 50,000. This funding may be used for projects such as community service, infrastructure improvements and housing for low-income residents. Typical projects funded in the past include infrastructure improvements in low-income areas and construction of public facilities.

Major Revenue Source

The only revenue available for this fund is the federal grant that the City is entitled to. This grant operates on a reimbursement basis, which means it never has a cash balance available to earn interest income. This program's revenue is expected to be ±\$1.2 million in FY2012-13.

Expenditure Trends

Administrative funding is set at \$264,192 with ±\$974 thousand appropriated for Council designated projects.

State Housing Initiative Partnership (S.H.I.P.) Fund

The state SHIP grant that the City receives is accounted for in this fund and is used to assist low-income households with down payment and housing rehabilitation costs. The applicants must qualify according to an income level based on family size. Any request for repair funding must deal with a

health and/or safety issue on their existing home. For down payment assistance, the applicants must meet the low-income standard to qualify but then also qualify with a financial institution for their home mortgage.

Major Revenue Source

Revenue for this fund is from the state grant and is received by the City on a monthly basis. The state earns these funds through documentary stamps charged to all real estate transfers. The only revenue expected is \$14 thousand as the state has reduced this program. There is an expected fund balance to carryforward into next year of \$78 thousand.

Expenditure Trends

The remaining funds for this program are budgeted at \$33,535 thousand for administrative costs with \$93 thousand available for the housing program.

Water & Sewer Special Assessment Funds

These funds are for payment of the annual debt service on the bonds used for financing the water and sewer improvements in each of the special assessment districts. The annual assessment revenue collected from the residents is the source of funds. Each district has its own individual fund in order to match the actual costs of the district with the assessment to its residents. The bonds have a 20-year payback schedule. Each of these funds has accumulated a balance that represents positive cash flow due to assessments being collected at a faster rate than the scheduled debt service. This is leading to interest income being generated, which will benefit that particular district and can allow for early payments against the debt.

SW Annexation SAD Debt Service Fund

This fund is for payment of the annual debt service on the bonds used for the infrastructure improvements made in this special assessment district. The annual assessment revenue collected from the property owners is the source of funds. The bonds have a 33-year payback schedule and are dependent on the land owners paying their assessments as their property is developed in the future and gains value.

Wyndcrest – DD Debt Fund

This special revenue fund covers the annual lease collections and payment of the annual debt service associated with the facility built to house the Digital Domain firm is now located in our community. Bonds were issued to fund the capital improvements and now the firm pays annually a lease to cover the debt payment.

South Lennard Road SAD Fund

This special assessment fund covers the annual assessment collections and payment of the annual debt service associated with the PUD. Bonds were issued to fund the capital improvements and now the property owners pay annually an assessment to cover the debt payment. This SAD was annexed into the City and the improvements were made to help create a commercial district.

River Point SAD Fund

This special assessment fund covers the annual assessment collections and payment of the annual debt service associated with the PUD. Bonds were issued to fund the capital improvements (roads, drainage and utility lines) and now the property owners pay annually an assessment to cover the debt payment.

Tesoro SAD Fund

This special assessment fund covers the annual assessment collections and payment of the annual debt service associated with the PUD. Bonds were issued to fund the capital improvements and now the property owners pay annually an assessment to cover the debt payment. Any contingency generated will remain in this fund and will help accelerate debt retirement.

Glassman SAD Fund

This special assessment fund covers the annual assessment collections and payment of SAD Funds of the annual debt service associated with the PUD. Bonds were issued to fund the capital improvements and now the property owners pay annually an assessment to cover the debt payments.

East Lake Village SAD Fund

This special assessment fund covers the annual assessment collections and payment of the annual debt service associated with the PUD. Bonds were issued to fund the capital improvements and now the property owners pay annually an assessment to cover the debt payments.

St. Lucie Land Holding SAD Fund

This special assessment fund covers the annual assessment collections and payment of the annual debt service associated with the PUD. Bonds were issued to fund the capital improvements and now the property owners pay annually an assessment to cover the debt payments.

City Center SAD, 2006 Series

This special assessment fund will track the collections and then the debt payments associated with the public infrastructure improvements in the City Center project. The property owners in the district will either make a contribution for their share of the cost or they can make payments according to the financing plan. These improvements were for the public areas of what is called City Center, an area of redevelopment along US 1 that is planned to have a combination of residential, retail, office and public uses. Also included in the concept is the City's new Civic Center which opened in recent years and provides recreational and meeting room opportunities for the public.

Combined Road SAD, Series 2006

This special assessment fund will track the collections and then the debt payments associated with the three small road / intersection improvements. The property owners in the three districts will either make a contribution for their share of the cost or they can make payments according to the financing plan. These funds will be used to retire debt associated with making the improvements.

Torrey Pines Collection Fund

This special revenue fund will use Public Building Impact Fees collected by the City to make the annual debt payments on the bond debt issued for the construction of the facility that will house the research firm, Torrey Pines Institute for Molecular Studies. The revenue is based on guaranteed fees from certain developers that contracted with the City to help fund this project. However, the projected revenue from impact fees will be supplemented with a transfer of \$2.1 million from the General Fund to ensure debt coverage.

Community Redevelopment Agency Fund

The financial activity of the Community Redevelopment Agency (CRA) is tracked in this special revenue fund. The budget schedule for this fund is presented in a format to show the projected growth in revenue into the future. The CRA earns revenues based on the increase in taxable values within the established district. The tax year 2000 will serve as the base year to calculate the growth in tax value. Due to falling property tax value and the associated revenue, this fund will not be able to fund the debt service originally designated for this fund. Changes have been made to minimize the operating costs for the CRA including the elimination of any administrative charges from the City. City Management is recommending using funds from the Parks MSTU Fund to purchase this asset for the City.

General Obligation Debt Service 2005 Series Fund (Crosstown Pkwy)

This is the special revenue fund that will post the Ad Valorem Property Tax revenue associated with the millage rate designed for the debt payments for the Crosstown Parkway road project. The voter referendum allowed the City to issue \$165 million in bond debt to fund this project and use Ad Valorem Property Tax to retire that debt. The current millage rate for this purpose is 1.2193. With the passage of Amendment One and falling property values, the Ad Valorem Tax Revenue for this fund has dropped substantially in recent years. The value used to generate the required revenue for this project is half of the value from 2007. In future years when the final level of bonds is issued, the annual debt service will increase and the revenue generated by this millage rate will have to be reviewed to be sure there are sufficient funds available.

Police Forfeiture Fund

This fund tracks the assets, cash and otherwise, that have been seized by the Police Department because of illegal activity. The proceeds in this fund are used to pay the legal fees associated with acquiring these assets and then can be used to purchase special equipment needed for surveillance work, crime prevention, school resource officers, grant matching funds and other law enforcement purposes as stipulated by Florida State Statute 932.7055(4). This helps fund some of the equipment needs of the Police Department without drawing on property tax revenues from the citizens.

Major Revenue Source

The only significant revenue for this fund is from the assets that the Police Department has seized. This can be unpredictable and the State rules governing this fund only allow for budgeting of funds that are actually on hand. The City is not allowed to budget any potential revenue from forfeiture activity. Thus, the proposed budget is only able to budget its projected cash carryforward of \$77,426 plus the expected interest income of ±\$500.

Expenditure Trend

The proposed budget is allowing the use of \$20,000 for administrative costs related to court cases. There will be a transfer to the General Fund to help fund the staff cost for this program. The balance of \$47,926 will be held as a contingency for future needs.

Medical Insurance Fund

This fund tracks the accumulation of the employee and employer contributions that fund the total cost of the Health Insurance Program for the city staff. The City is self-insured for Health Insurance and directly benefits from any period of lower claims. A system of internal rates is used to charge the various department budgets based on the number of participants and their type of coverage. Included in this fund's budget is the cost for the City Clinic which is available for the covered employees and dependents.

Major Revenue Source

The largest revenue for this fund is the employer contributions toward employee health insurance. This figure is charged as an expense to the operating departments while it is revenue to this fund. The employer contribution revenue will be less in the current fiscal year due to the lower number of employees but also because of the reshaping of the funding ratios that places a larger financial responsibility on the employees. For FY 2012-13, the employee contribution total will increase by ±\$500,000. The combined total of these two funding sources will be lower than the current year by ±\$500,000 because of the favorable claims trend, which allows the City's cost to decline by roughly \$1 million.

Expenditure Trends

Because the City is self insured for its health insurance program, the claims paid is an ever changing cost number and the largest single cost to this program. Due to fewer employees and a lower claims trend, the budget for claims will be set at \$11 million. That is \$1.8 million less than the actual amount paid in FY 2009-10. The other costs in this program, the employee health clinic, admin charges and insurance costs are expected to remain about the same. Included in the proposed budget is a one time transfer of nearly \$1.8 million to the various operating funds that make contributions to this fund. The purpose of this transfer of surplus fund balance is to fund the employee bonus that is being budgeted in the operating department budgets. This is possible because the fund balance that was built up in recent years with the favorable claims experience. Also of note, this fund is budgeting a 60 day / 17% contingency which is required in order to have our self insurance health plan certified by the state. This also is in line with the GFOA recommended contingency level that is being instituted in most of the operating funds of the City.

Conservation Trust Fund

The City's Conservation Trust Fund accumulates mitigation fees paid by developers who chose to make this payment in place of preserving a portion of their sites as required under the City's Land Development Code. These fees can be used for preservation of conservation land. This fund has used available funds in past years for several land purchases. With \$497,010 projected as a balance to carryforward into FY 2012-13, only a small amount is appropriated for possible administrative costs leaving a contingency of \$510 thousand available for future projects.

Other Post Employee Benefits (OPEB) Trust Fund

The City's OPEB Trust Fund accounts for the funding of benefits for retirees which for the City of Port St. Lucie is the Health Insurance Program available to retirees. This is a requirement of GASB statement #45. The various operating funds are charged an annual amount that has been calculated to generate the future amount needed to provide the health insurance benefit for the group of retirees. The revenue in this fund is the transfer from the operating funds, which is an expense to the various departments. The annual expense is the cost of health insurance for retirees who qualified for the benefit with those funds being transferred to the Medical Insurance Fund. This benefit was altered to reduce the cost to the City and reduce the required annual contributions.

Solid Waste Non-Ad Valorem Assessment Fund

This fund is to account for the revenues and expenditures associated with the collection of solid waste in the City. The assessment is placed on the property owner's tax bill and passes thru the County Tax Collector to the City who will then pay the vendor providing the service. Handling this service thru the tax bills provides a reduced fee to the citizens of our community. The reduction of uncollectible accounts and the cost reduction for billing and collecting will generate a savings that can pass on to the citizen.

Capital Improvement Funds (C.I.P.)

This section includes a summary of the five-year capital improvement plan by fund in fiscal years 2011-12 through fiscal year 2016-17. Sources of funds and the project costs are shown per year.

The series of funds that budget Capital Improvements (equipment and projects that cost \$35,000 or greater) are collectively known as the Capital Improvement Plan. These budget schedules reach five years into the future for the benefit of planning the funding, which can sometimes involve financing. The first year of this five-year schedule is called the Capital Budget and is adopted as part of the budget total for FY 2012-13.

The General CIP Fund is for the capital improvement projects related to those departments of the General Fund. The small ad valorem tax rate that was allocated into this fund was shifted into the Road and Bridge Operating Fund in prior years. This strategy change leaves this fund with no annual revenue source. The only items projected for this fund is a fire suppression system for two departments of the City that have computer file servers plus a replacement tractor loader. This leaves a remaining balance of only \$15,000.

The Road & Bridge Capital Improvement Fund has several significant revenues. There are two levels of additional gas tax (\$3.2 million total) and 0.5583 of a mill for Property Tax (\$3.3 million). There is also ±\$3.7 million in projected cash carryforward of fund balance from the prior year. Road Impact fees are only budgeted to bring in \$250,000 which is a small fraction compared to the level of collections in past years during the strong growth years. One of the largest projects in 2012-13 is the \$1 million for the annual resurfacing program. Numerous smaller projects are budgeted including a number of sidewalk projects with FDOT grant funding available for them. There is a transfer of \$4.9 million to the Road and Bridge Operating Fund to cover the annual debt service associated with bonds that funded prior road improvements and repayment to the Utility Contingency Fund for an internal loan. The internal loan was needed to cover the funding shortfall for the SW Annexation Capital Fund caused by poor interest earnings and investments made into a State of Florida investment pool that

were frozen due their poor investment return. This fund's budget as proposed will have a small contingency of only \$140 thousand to help cover any budget shortfalls and be available for future years.

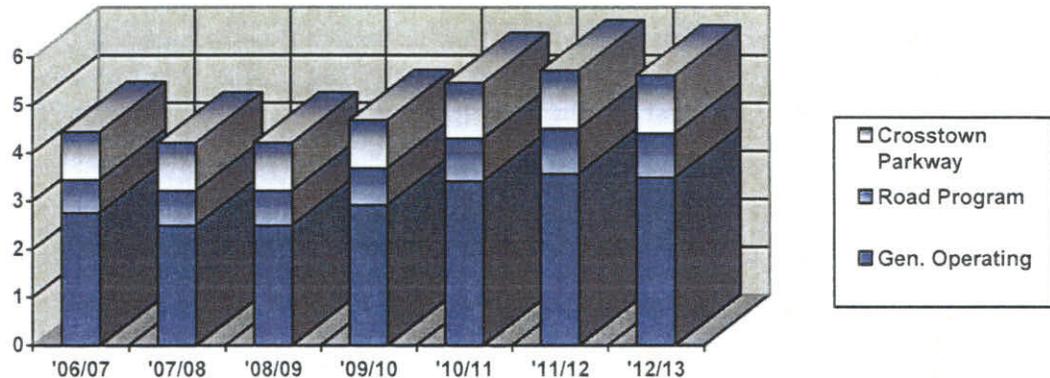

The Parks Impact Fee fund is budgeted to collect only \$32 thousand in FY2012-13 which is a substantial decrease from prior years due to the drop in construction. There is only one project proposed (design for Skate Park - \$75,000) with the remaining funds being accumulated for future projects.

The Parks MSTU CIP Fund tracks the financial activity associated with the countywide property tax rate of 0.2500 that passed with a voter referendum. This dedicated Millage Rate was later reduced to 0.2313 due to tax reform requirements from the State of Florida. The revenue is projected to be \$1.2 million in FY 2012-13 with level revenues into the future. This revenue is reduced from past years because of the drop in taxable value and the corresponding revenue. The largest single project planned in FY 2012-13 is the Canal Park boat launch project for \$1,750,000. Additionally, there is \$577,334 budgeted for replacement of sportsfield lighting that is more efficient. This is part of the City Wide Honeywell Project efficiency project. Other than a couple of small projects funded for FY 2012-13, several other projects are unfunded at this point and are listed at the bottom of this schedule. This fund will also be making an annual transfer to the CRA fund as a contribution toward the purchase of the Civic Center asset.

The Crosstown Parkway CIP Fund is for the construction of the additional east/west main route through the City. A successful voter referendum in June 2004 allows the City to issue bonds (\$165 million) to fund this huge project to move forward instead of relying on cash funding it over many years into the future. At this point in the project, all phases are complete with the exception of phase one, the connecting bridge over the St. Lucie River. This final phase is projected to be under construction in fiscal years 2014-15. The final bond issue (\$71 million) plus funding from FDOT and grants should complete the required funding.

Impact of Capital Improvement Program to the Operating Budgets – When the final segment of Crosstown Parkway is completed there will be an increase to the operating budget of the City for electric costs of the street and pedestrian lighting. The proposed more efficient lighting for several sportsfields will save the City on electric costs.

City of Port St. Lucie Millage Rates

Fiscal Year	06-07	07-08	08-09	09-10	10-11	11-12	12-13
General Operating	2.6656	2.4931	2.4931	2.9174	3.4106	3.5688	3.4897
Road & Bridge Operating	0.1833	0.2565	0.2565	0.3016	0.3526	0.3698	0.3616
Road CIP Program	0.5000	0.4676	0.4676	0.4676	0.5466	0.5710	0.5583
Crosstown Parkway Debt Service Fund	1.0000	1.0000	1.0000	1.0000	1.1625	1.2193	1.2193
General CIP	0.0910	0.0000	0.0000	0.0000	0.0000	0.0000	0.0000
Total Millage Rates	4.4399	4.2172	4.2172	4.6866	5.4723	5.7289	5.6289

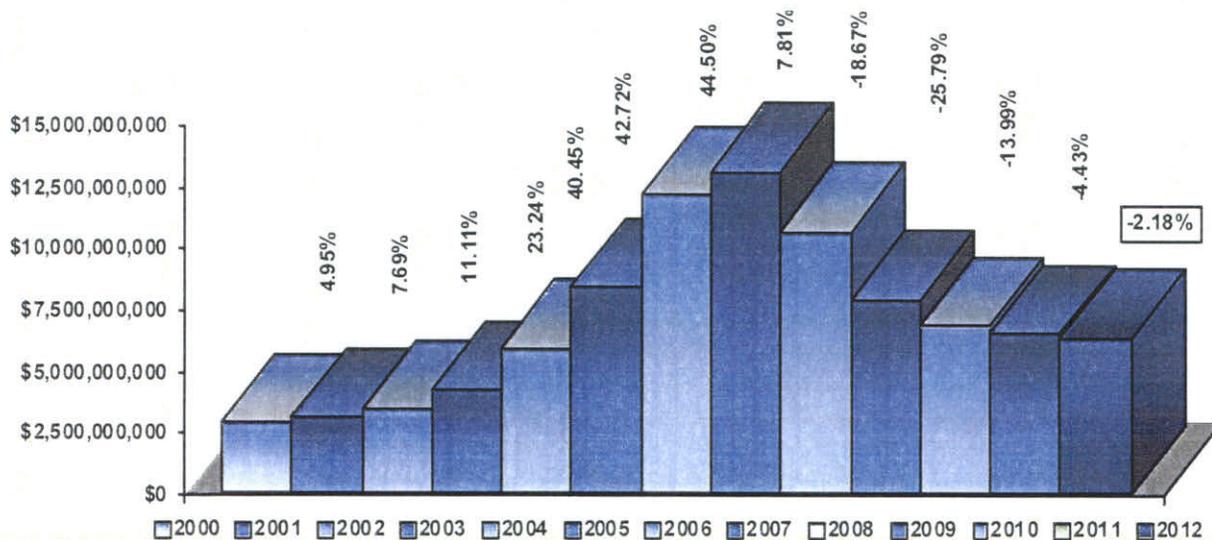

The City's millage rate is the tax rate charged against both residential and commercial properties within the city limits. It is formally called an Ad Valorem Tax Rate meaning that it is charged "per value". All properties are assessed a taxable value by the County Property Appraiser. The tax bill for a piece of property is then calculated by multiplying the taxable value times the adopted millage rate(s). Millage rates are expressed for example as 1.2345, and are charged against the value in thousands. Residential property owners who use their home as their primary residence can apply for a \$50,000 homestead exemption, which drops their "billable" tax value by that amount. This chart shows seven years of millage rates broken into the numerous programs that are funded by Ad Valorem Revenue.

For several of the early years in this chart, the tax rate was decreased due to the strong increase in taxable value which raised the level of revenue. Now in recent years, the opposite is happening. Taxable value is falling so in order to offset that downward force on the revenue, the Council raised the tax rate three times.

The total recommended millage rate for FY 2012-13 is 5.6289 which is a reduction of 0.1000 from the FY 2011-12 rate. It is important to note that even with the millage rate being higher than earlier years, the total revenue generated is reduced because of the impact of reduced taxable value.

City of Port St. Lucie - Property Valuation

This graph shows the property valuation for the City of Port St. Lucie, which is set by the St. Lucie County Property Appraiser and is an important demographic indicator for the community. The level of taxable valuation sets the tone for the development of the budget each year. The City of Port St. Lucie had steady growth of 2 –5% increase for a number of years. Beginning in 2002, the rate of growth began climbing and then for three years, the increase exceeded 40%. Large numbers of new homes being built pushed the total property valuation upward at record rates as Port St. Lucie became the fastest growing City over 100,000 in population. The majority of the valuation increase in those three years was due to the strong real estate market which pushed the value of existing home to record high levels. This serves to increase the Ad Valorem Tax Revenues of the City in direct proportion.

Beginning in 2008, the taxable value began falling. The 2012 tax roll is the fifth continuous year that the City has experienced a decline in value which is representative of the real estate market of

recent years and the general economy of our community.

The proposed FY 2012-13 budget is based on the certified taxable value of \$6,317,778,096 which is 2.18% less than the prior year. This value is almost down to the same level the City experienced in 2004 and is 48.5% of the peak value established in 2007.

Amendment One, which passed in January 2008, allows for an additional \$25,000 in Homestead Exemption (\$50,000 total) and is contributing toward this trend in taxable value. Due to the real estate market suffering a huge drop in market value in recent years, the taxable value for the City has suffered greatly.

There is indication that perhaps the real estate market has bottomed out. For the purpose of future financial projections, the City is projecting flat taxable value. Perhaps at some point, a slight upward trend will show up.

Typical Tax Bill for PSL Homesteaded Property

(City Portion of Tax Bill)

	2008	2009	2010	2011	2012
		25.99% drop	13.99% drop	4.43% drop	2.18% drop
Assessed Value	\$173,891	\$141,940	\$129,078	\$125,575	\$123,927
Less Homestead	(50,000)	(50,000)	(50,000)	(50,000)	(50,000)
Taxable Value	<u>\$123,891</u>	<u>\$91,940</u>	<u>\$79,078</u>	<u>\$75,575</u>	<u>\$73,927</u>
PSL Tax Rate	4.2172	4.6866	5.4723	5.7289	5.6289
PSL Tax Bill	<u>\$522.47</u>	<u>\$430.89</u>	<u>\$432.74</u>	<u>\$432.96</u>	<u>\$416.13</u>

City Property Tax Bill decreases over five years.

This chart is tracking a property tax bill based on the average bill in 2008 and then applying the average gain or drop in value as allowed for under Save our Homes for homesteaded property. Because of the continuous drop in assessed value, the taxable value is dropping according to the average percent drop as noted across the top of this table. The taxable value in this example is then applied to the adopted millage rate each year to generate the tax bill for the City's portion of the property tax bill.

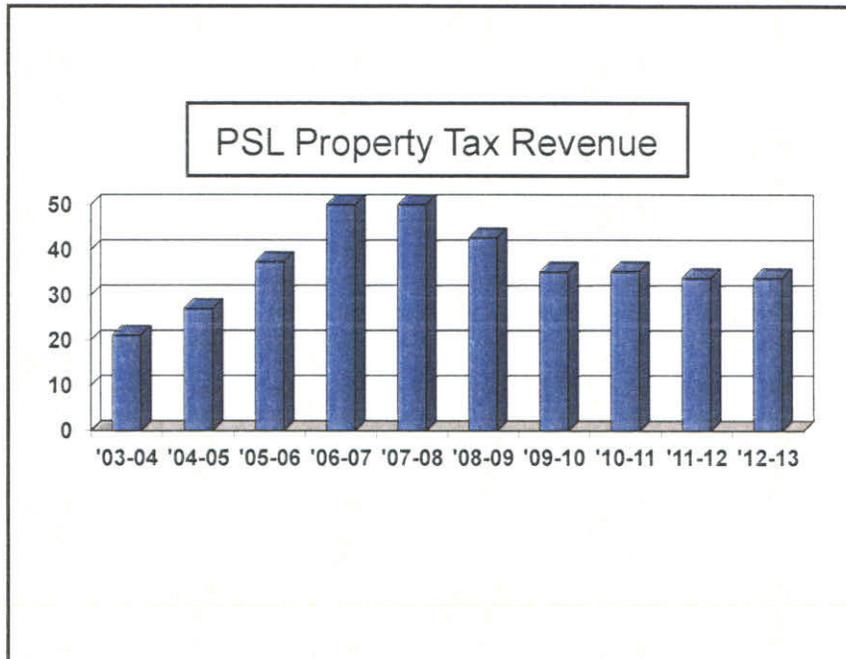

Due to the millage rate being raised three years, the tax bill climbed a very slight amount in two of the years. In those years the higher millage rate compensated for the drop in value.

With the proposed reduction to the City's millage rate for FY 2012-13 (0.1000) and the slight (2.18%) drop in taxable value, the estimated tax bill in

this example will decline to \$416.13, which is a drop of \$16.83 or 3.9% over the prior year. Over the five years represented in this chart, the decline in this example tax bill is \$106.34 which is 20.4%.

The chart is further proof of the reduction in Property Taxes in the City of Port St. Lucie. It has been possible due to the careful restructuring of the City Budget including a strong reduction in staffing and in some cases a reduction in the level of service.

(THIS PAGE INTENTIONALLY LEFT BLANK)

The total level of Ad Valorem Property Tax revenue is shown in the chart above. It is quite easy to note that this is a major issue with the City's budget as the revenue for FY 2012-13 is below the level collected in FY 2005-06. The drop in revenue from the prior year is \$1.4 million. This proposed revenue is based on two factors, the 2.18% decline in taxable value and the proposed 0.1000 decline in millage rate. The level of Property Tax revenue tracks consistently with the level of Taxable Value as the total value peaked on the 2007 tax roll that generated the revenue in FY 2007-08. The Property Tax revenue for the City is allocated 62% to the General Fund (\$21 million), 21% to the Crosstown Parkway road project (\$7.3 million) and the remaining allocation goes toward the Road Operating and Road CIP funds (\$5.6 million).

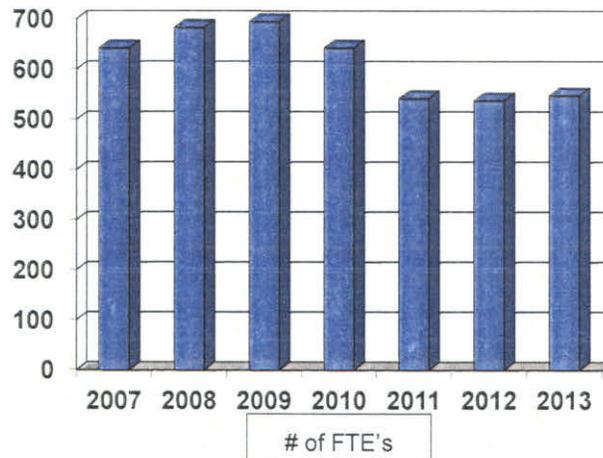

The primary problem with this trend is the loss of revenue to the General Fund which impacts the ability to fund the Police and Parks & Recreation

Departments plus administrative departments. This issue has led to staffing reductions in these departments. The Police Department lost 50 sworn officers in recent years but will now benefit by adding 15.5 sworn officers to their staffing level due to a recent reorganization. Overall the General Fund has lost 146.1 (21%) FTE's since FY 2008-09.

It is noted that the revenue of the last four years are roughly flat based on the recent years when the Council raised the Millage Rate to compensate for the drop in taxable value. The important point of this graph is the fact that available revenue from Property Taxes is down substantially from the peak in 2007-08. For the future years, it is hoped that a relatively flat taxable value will result in a flat millage tax rate and generate a stable revenue stream for the City.

(THIS PAGE INTENTIONALLY LEFT BLANK)

General Fund Staffing

Because staffing costs are the major component of most department budgets, tracking the number of FTE's is a critical statistic to monitor. The budgeted number of FTE's and the actual FTE's are compared each month to ensure that proper levels of staffing are maintained. With the current financial issues, the City is taking steps to control costs which lead to reducing the staffing costs in past years. The City froze payrates and raised the employee health insurance contributions. In addition to these adjustments, the City reduced staffing levels by an overall 21% in recent years. The trend in FTE's reported in the General Fund follows closely the trend of property tax revenue in the General Fund which is the largest single revenue in this fund.

It should be noted that the proposed number of FTE's for FY 2012-13 is

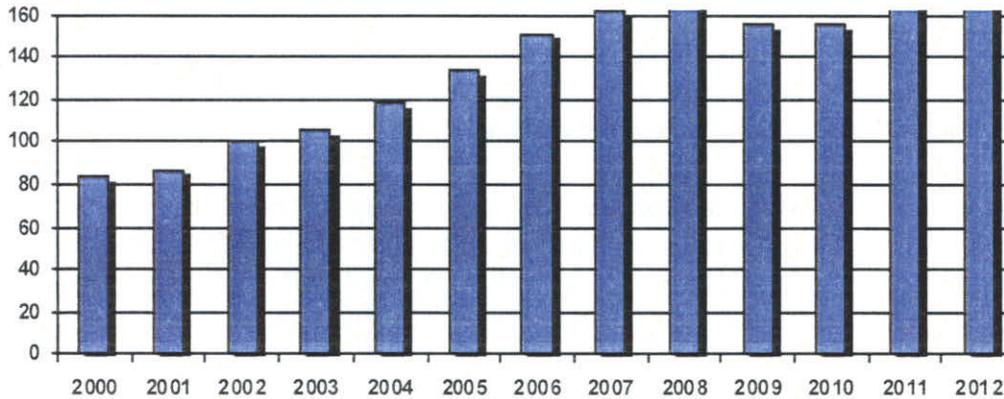

548.28 which is a slight increase of 10.27 FTE's. This is mostly due to the increase in sworn officers in the Police Department. The recent department reorganization allowed a shift of resources from management staffing to the patrol function and allowed an increase in sworn staffing of 15.5 FTE's.

Also of note, even though the staffing levels were being adjusted, the cost of health insurance and previously approved raises in past years pushed the total cost higher. However in the past two years, with no raises and better levels of claims for health insurance, costs have fallen. This is the largest cost factor in the General Fund and is allowing this fund to show a balanced budget and avoid the deficit spending trend of past years.

City of Port St. Lucie Population

164,603
projected in
October 2012

This population chart again shows the strong growth pattern experienced by the City of Port St. Lucie. Having been incorporated in 1961, our population was only 330 in 1970. However, our population is estimated to be at 164,603 thousand in October 2012. Annual increases had been averaging approximately 3,000. However, the growth pattern exceeded that trend between 2003 and 2007 as tremendous numbers of new homes were constructed. Port St. Lucie often was listed as one of the fastest growing cities in the nation. This level of growth in past years was the driving force behind the infrastructure needs of the city and also increasing levels of service. Over the years, the Parks and Recreation, Police and Utility Departments have grown to reflect the growth of the community.

However since 2007, the number of new home permits dropped substantially which has caused a slower growth rate for the City.

And along with the slower growth rate, the inventory of homes on the market has climbed. These conditions lead to a slight decline in the population estimate. This real estate activity has then driven down the taxable value in the City which greatly impacts the City's budget. The general economy has suffered during this same time periods which has negatively impacted other revenues of the City. With few new homes being built and the movement of population, it is estimated that the population held steady from the prior year.

A Different Growth Pattern in the City

For many years, the key issue facing the City of Port St. Lucie was our rapid growth. Our rate of growth caused the City to address expansion of the transportation system, Police staffing, Parks & Recreation programs and the Utility System. However, that trend changed beginning in 2007 when the level of tax value growth slowed followed by years of declining taxable value. Additionally, several other revenues and indicators of the City saw a decline. Four major indicators are discussed below and shown in the attached charts.

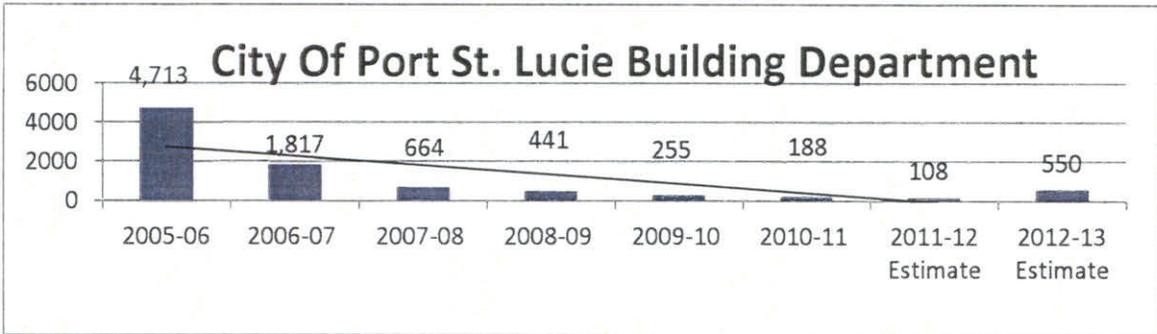

Perhaps the most amazing growth indicator was the record jump in taxable value from 2004 through 2006. For each of these tax rolls, the taxable value grew by over 40%. However, the 2007 tax roll that generates Property Tax Revenue for the FY 2007-08 budget only grew by 7% which was the peak in taxable value in the City. Since then, the taxable value has dropped dramatically leaving the 2012 value of \$6.3 billion at less than half of the peak value (48.5%).

One of the quickest ways to view the growth pattern is to study the number of building permits over the past few years as shown in the following graph. The number of residential permits has dropped substantially from the record levels in past fiscal years. This factor was taken into account when forecasting the permit revenues as well as impact fees for FY 2012-13.

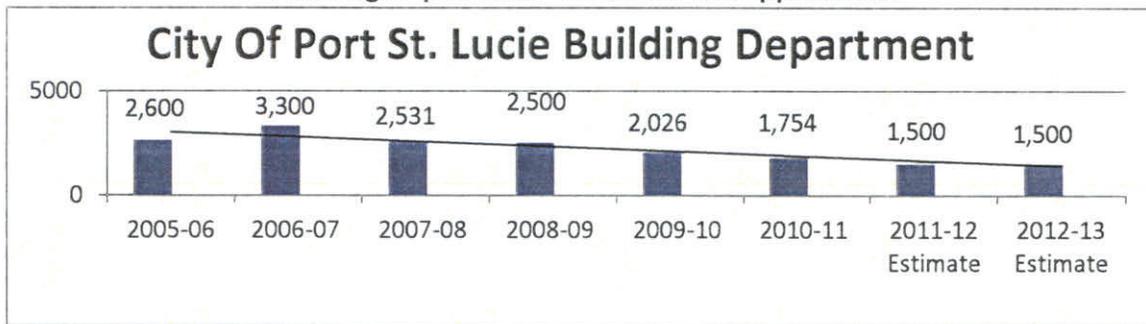

The City also saw strong growth in the number of business tax applications during the growth years. However, the recent figures show a different trend with fewer businesses paying an annual business tax. If the local economy can get healthier, this indicator should show growth into the future. The planning department is also reviewing fewer applications for rezoning than in past years.

The number of calls for service in the Police Department grew in line with the rapid population growth in the early years represented in this chart. But in recent years, the growth in this indicator flattened out. Although this is often the single overall indicator, other factors should be considered when reviewing the Police Department's workload such as the crime rate and types of crimes.

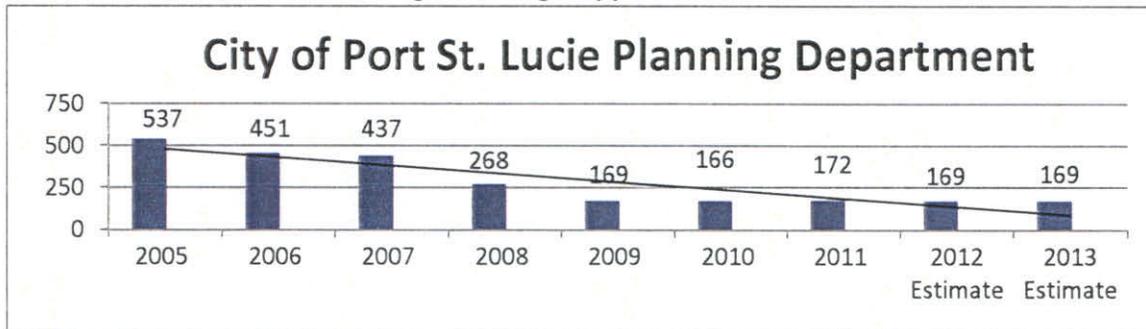

Building Department - Building Permits Issued - Single & Multi Family Residential

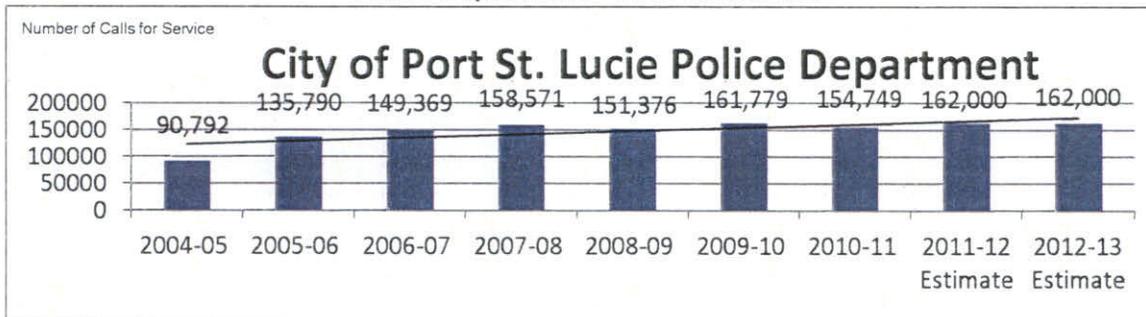

Building Department - Business Tax Applications

Planning & Zoning - Applications Received

Police Department - Calls for Service

BUDGET USERS GUIDE

The Annual Budget for the City of Port St. Lucie consists of thousands of numbers arranged into dozens of separate funds. Each of these funds exists for the purpose of tracking the financial activity of money that is for a designated purpose. Each fund can be thought of as a separate subsidiary company with its own revenues and expenses.

The working copy of the proposed budget that is used during the budget workshops is presented in a summary format. For example, a cost center typically has just three numbers presented, (1) the sub-total for personal services (salaries & benefits), (2) the sub-total for operating expenses, and (3) the sub-total for capital outlay (equipment valued between \$750 & \$35,000). This format is used instead of presenting the cost center "by individual line item" which could be 2 to 3 dozen numbers. An even further detailed level of information would be to provide the backup discussion of all the individual line items, such as all the contracts listed under the "contractual services" line item. The summary format allows Management, City Council and interested citizens to read the budget without dealing with thousands of detailed numbers. This format allows for trend analysis and grasping of the big picture. If a question is raised on a certain figure, the detail supporting it can be reviewed for an explanation.

BUDGET ORGANIZATION

MANAGER'S BUDGET MESSAGE

As required by City charter, each year the City Manager prepares a Budget Message that serves as an overall guide that is intended to give the general flavor of the proposed budget. This is the manager's narrative that allows discussion on important issues.

Budget Overview

A brief summary of each fund is offered by the Director of OMB. This is meant to be more detailed than the Manager's Message yet still in a narrative format. Schedules and graphs are also included covering such topics as millage rates, taxable valuation and staffing proposals. Staffing is accounted for using F.T.E.'s (Full Time Equivalent) as a unit of measure.

TRIAL BALANCE - PER FUND

The first schedule exhibited for each fund is a single page trial balance. This is the most summarized format showing the Revenues and other Sources of Funds matched against the Expenditures. Both revenues and expenditures are lumped into major categories in order to produce a single page budget schedule for that particular fund. The Trial Balance schedule for each operating fund, like other supporting schedules, lists a total of five years. The suggested format of the Government Finance Officers Association is that budgets should show the actual results of two prior years, the estimated results of the current year and then the proposed budget; four years in total. Additionally, OMB includes the current year adopted budget, and projection

for the second year into the future. Two year operating budgets are helpful for being "on guard" against future financial problems. Future deficits can be overcome easier with greater lead-time.

REVENUE SCHEDULE - PER FUND

The revenue schedule for each fund offers the detailed, line item by line item information that makes up the total budgeted revenues and sources. This schedule identifies each individual revenue. It also is presented in a five-year format; two prior years actual results, the current year adopted budget, estimated results of the current year, the proposed budget of the next year and then a projection of the second year into the future. This schedule is helpful when trying to understand when one revenue may have caused a drop in a major category of revenue. In the General Fund, the seven revenues listed on the trial balance take three pages when listed individually.

EXPENDITURE SCHEDULE - PER FUND

The expenditure schedule is a presentation of the requested expenditures, listed by cost center. A cost center can be a department or a division of a department. The proposed expenditure budget is presented in two levels or portions. Each department requests a level of funding that will allow the same number of employees to perform the same tasks and programs in the upcoming year, known as the current level budget request. And then additionally, where a department has a need to add employees and/or programs, a budget request is submitted known as an expanded services budget request. The budget request is presented in this manner so that a reader can identify the cost of maintaining an equal level of service and can also see separately the cost of enhancing the level of service. Showing the cost of expanded service can be helpful when trying to determine if the request should be funded, especially when a rate increase is needed.

The expenditure schedule is also presented showing five years of data. The first two columns give the most recent historical years. This is actual, audited results, not the budgeted figures for those years. The third column is the current year adopted budget, and the fourth column is the estimated results for the current year. Again, actual not budgeted data is presented as the projected actual number is more helpful for trend analysis. The next six columns (#3 → #8) deal with the proposed budget for the next year.

Current Level -- The fourth column lists the request for the current level of service; those dollars needed to perform the same program with the same number of employees. The adjacent column shows the percent increase for the current level request over the current year estimated actual use. The increase (or possible decrease) is an indication of the inflation rate.

Expanded Services -- The sixth column identifies the funds needed to expand the level of service in any particular cost center. The funds requested as expanded services for the cost of new employees and other operational expenses such as their uniforms, tools, equipment, vehicle costs, etc. Also, any necessary capital outlay requests are listed, possibly covering items such as vehicles, radios, computers or other items costing \$750 or more with a useful life of at least one year. Often the expanded services requests draw the most attention during budget workshops. These figures represent growth in the organization that is in response to growth in the community and a corresponding need for a new program and/or an increased level of service for an existing

program. Very often, such as in the City's Stormwater Fund, expanded services requests require an increase in the annual fee.

Total Budget Request -- The seventh column lists the total budget request for next year for each cost center, combining the current level request (column 4) with any expanded services funding request (column 6). This total request is compared against the third column (estimated current year) to then list the total increase and/or decrease between the two years. This difference is shown in dollars in column eight. Column nine then shows the percent increase, the increase or decrease amount (column eight) divided by the current year estimate (column 3).

Second Year Projection -- The final column (#10) lists a projected request for the second year into the future. These figures are based on trends and are for planning purposes. Taking a look two years into the future has proven to be very helpful for financial planning of the City's operating budgets.

PROPOSED CAPITAL OUTLAY

The final schedule for each operating budget request is a listing of the proposed capital outlay. Capital Outlay is any purchase of \$750 or more that has a useful life of at least one year. The listing identifies the individual items that make up the funding request in the expenditure summary, current and expanded, columns 4 and 6. This listing allows the reader to review the necessary equipment needs of the staff, such as buying patrol vehicles when additional officers are added and also replacing the vehicles to be retired.

CAPITAL IMPROVEMENT FUNDS

There are several funds that are for major capital improvements and equipment costing in excess of \$30,000. These funds are known collectively as the City's Capital Improvement Program or C.I.P. These funds are shown using a different format. Five future years are listed with no historical data. Due to the nature of these projects, large one-time expenditures, trend analysis using past years is not helpful. The City has a General CIP Fund, a Road and Bridge CIP Fund and several CIP funds under the Utility Department's group of funds.

I trust that this explanation is helpful to the readers of the proposed budget. As always, the OMB staff encourages anyone with questions or suggestions to please call.

**CITY OF PORT ST. LUCIE
GENERAL FUND
LONG RANGE PLAN**

Assumptions: This model is based on a decrease in property values by 2.18% in fiscal year 12-13, reduction of .10 of overall Millage, plus a contingency of 17%. Personal Service assumes 1.5% pay increase and a one time bonus of \$1,554.00 in Fiscal Year 12-13. There are no increases in future years. In 2011-12, the City lowered it's estimated costs to the Health Insurance Fund by 1.2 million. Purchase of Civic Center and Village Square starting in 15-16 and beyond. The last payment for the 2008 Sales Tax Refunding is \$993,200 and ends in fiscal year 2016-17.

**CITY OF PORT ST. LUCIE
ROAD & BRIDGE OPERATING FUND
LONG RANGE PLAN**

Assumptions: This model is based on a decrease in property values by 2.18%, plus a .10 reduction in the overall Millage in fiscal year 12-13, plus a contingency of 8%. Personal Services assumes a 1.5% pay increase and a one time bonus of \$1,554.00 in Fiscal Year 12-13. There are no increases in future years.

**CITY OF PORT ST. LUCIE
WATER & SEWER OPERATING FUND
LONG RANGE PLAN**

Assumptions: Operating Revenues will increase based on a 3% rate increase to both water and sewer operating revenues in 12-13, 13-14 and no further increases in future years.
Personal Service assumes 1.5% pay increase and a one time bonus of \$1,554.00 in Fiscal Year 12-13. There are no increases in future years.

A transfer of \$4,660,000 is proposed to be made from the Rate Stabilization Fund #440 into the #431 Operating Fund in Fiscal Year 12-13 and then reduces in future years. This transfer decreases the 440 Contingency Fund.
A Interfund Transfer is made annually to the #438 Replacement Fund from the #431 Operating Fund. (The #448 Fund is used for well rehabilitation, backlog preventers, emergency repairs and improvements other than buildings).
Note: The Utility Bond ordinances enacted by the City require the adoption of rates necessary to provide net revenues equal to 100% of the annual debt service requirement.
