COUNCIL ITEM 7C
DATE 12/3/12

December 3, 2012

Meeting Date: November 26, 2012

Public Hearing Ordinance Resolution Motion

Demandstar Broadcast Date: October 5, 2012

Item: E-Bid #20120086 - Guardrail Repair & Rehabilitation Projects

Recommended Action:

- 1.) Approval to reject all Bids as all bids received did not meet the required criteria.
- 2.) Approval to re-bid the project removing the restrictive qualifications and open the bidding to all Contractors.

Exhibits: Department memo attached [X] yes [] no

Summary Explanation/Background Information: An E-Bid was issued on October 5, 2012 for Guardrail Repairs and Rehabilitation Projects throughout the City on an as needed basis. The requirement of the Bid was that the Contractor must be FDOT Certified for Guardrail Repairs and any associated work. All bids received did not meet this requirement. Therefore, the Public Works Department is removing this requirement and requesting the bid be re-issued. The new requirement will be that the Contractor must follow FDOT standards for this type of work.

Deputy Director of OMB concurs with award: *CR* City Manager concurs with award: *gno*

MEMORANDUM

To: Cheryl Shanaberger – Deputy Director of OMB
From: Denise Burton, P.E. – Transportation Engineer 
Date: November 20, 2012
Re: E-Bid # 20120086-Guardrail Repair and Rehabilitation Projects

With this memo, we are acknowledging receipt of the bid tabs for the above referenced project that were submitted on November 15, 2012 at 3:00 PM.

After reviewing the bid tabs, we have decided to reject all bids since the contractor which submitted was not FDOT certified as referenced in the Contract Documents.

I have revised the bid documents to remove the FDOT certification requirement and would like to rebid the project as soon as possible to all qualified bidders.

If you have any questions or require additional information, please do not hesitate to contact me at 344-4364.

As always, thank you for your assistance in this matter.

/DLB
