Assumptions for Growth Factors: For FY 2012-13 and beyond, the assumption is the real estate market will be flat with little to no growth.

Assumption for Future Millage Rates: Budgetary Policy calls for staff to assume no change to the current Millage Rate.

Voted Debt Millage Rate: The City has 1.2193 mill dedicated toward the Crosstown Parkway road project. This is a voted millage based on a voter referendum that determined the City could charge a millage rate necessary to retire the debt on \$165 million in bonds. However, management is assuming no future change to the dedicated millage rate.

INTRODUCTION

The 5-Year District Facilities Work Program is a very important document. The Department of Education, Legislature, Governor's Office, Division of Community Planning (growth management), local governments, and others use the work program information for various needs including funding, planning, and as the authoritative source for school facilities related information.

The district's facilities work program must be a complete, balanced capital outlay plan that is financially feasible. The first year of the work program is the districts capital outlay budget. To determine if the work program is balanced and financially feasible, the "Net Available Revenue" minus the "Funded Projects Costs" should sum to zero for "Remaining Funds".

If the "Remaining Funds" balance is zero, then the plan is both balanced and financially feasible.

If the "Remaining Funds" balance is negative, then the plan is neither balanced nor feasible.

If the "Remaining Funds" balance is greater than zero, the plan may be feasible, but it is not balanced.

Summary of revenue/expenditures available for new construction and remodeling projects only.

Planning

Class Size Reduction Planning

Plans approved by the school board that reduce the need for permanent student stations such as acceptable school capacity levels, redistricting, busing, year-round schools, charter schools, magnet schools, public-private partnerships, multitrack scheduling, grade level organization, block scheduling, or other alternatives.

The St. Lucie County School District has a choice plan that allows us to use all schools in an attendance zone to the maximum program potential. A typical attendance zone may have five to eight schools of a particular grade level to allow parents to choose from the school. The students are assigned based upon available capacity. This allows us to use all the capacity before constructing new schools. The District also has a magnet school program that allows us fully utilizes the capacity at the intercity schools.

School Closure Planning

Plans for the closure of any school, including plans for disposition of the facility or usage of facility space, and anticipated revenues.

Accordingly, these obligations are no longer considered a liability of the City. The city has the following debt issues which have been refunded.

Derivative Disclosure – Interest Rate Swap:

Concurrently with the March 2007 issuance of Certificates of Participation (“COP”), the City entered into a Swap Agreement with Royal Bank of Canada (“Counterparty”). The notional amount of the 2007 COP Swap Agreement with the Counterparty originally was \$44,560,000. Commencing on May 2, 2007, and monthly thereafter, the City pays a fixed rate of 3.678% and the Counterparty pays 80% LIBOR. The termination date is September 1, 2017, unless terminated earlier as provided in the Swap Agreement.

In fiscal year 2009, the City entered into another Swap Agreement with Royal Bank of Canada concurrently with the 2008 Refunding issue of the 2007 COP with a notional amount of \$45,600,000. The 2007 Swap remained in effect, but its notional amount for both the 2007 and 2008 Refunding Swap. As of September 30, 2010, the notional amount for both the 2007 and 2008 Refunding Swaps was \$43,715,000. For the 2008 Refunding Swap, the City pays the USD-SIFMA Municipal Swap Index (formerly the USD-BMA Municipal Swap Index), and the Counterparty pays a fixed rate of 3.527%. Previously, the City pay rate was based on USD-SIFMA Municipal Swap Index. The termination date is September 1, 2027, unless terminated earlier as provided in the Swap Agreement. Upon earlier termination, a payment may be owed by the City to the Counterparty, or the Counterparty to the City, depending on the economic circumstances prevailing at the time of the termination. As of September 30, 2010, the fair value of the 2008 Refunding Swap Agreement was \$4,847,619 in favor of the City and the fair value of the 2007 Swap was \$5,510,593 in favor of the counterparty. The fair value was determined using a valuation model by an independent investment firm and used the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement on the swaps. In September, 2011, the City elected to terminate the Swap Agreements and delivered a payment of \$50,000 in consideration thereof.
